

INSTITUTIONAL STANDARD OPERATING PROCEDURE

CAMPUS AUDITORIUM OPERATIONS & IT INFRASTRUCTURE (2026)

DOCUMENT REF: SOP-AUD-IT-2026-V2 | EFFECTIVE: JAN 2026 - DEC 2026

Target Audience: Student Clubs, Event Organizers, Technical Leads, IT Administrators

Jurisdiction: Office of Student Affairs, Campus IT Infrastructure, Facilities & Safety Division

1. PURPOSE & SCOPE

This Standard Operating Procedure (SOP) governs all non-academic and co-curricular usage of the Main Campus Auditorium, AV control rooms, staging infrastructure, and associated campus network/hotspot reservations. All student organizations and technical societies must comply with these protocols prior to venue occupancy.

2. PERMISSIONS REQUIRED FOR AUDITORIUM TECHNICAL WORKSHOPS

To host technical workshops, hackathons, or robotics/hardware labs in the Auditorium, organizers MUST obtain all five (5) mandatory clearances listed below before key handover and system activation:

A. Primary Facility Clearance (Dean of Student Affairs - DoSA)

- * Timeline: Form AUD-REQ-01 must be submitted at least 14 business days prior to the event date.
- * Sign-off: Requires written endorsement from the Club Faculty Advisor and authorized Club President.

B. Technical & Audio-Visual (AV) Division Clearance

- * Technical Rider (Form AUD-TECH-R2): Requisition submitted to Chief AV Engineer $\geq$ 7 business days ahead.
- * Equipment Scope: Access to stage consoles (Behringer X32/Wing), motorized line-arrays, laser projectors, and DMX lighting grids requires certified operator clearance; club operators must undergo pre-briefing.

C. Electrical Maintenance Division (EMD) Load Clearance

- * Load Threshold: Mandatory when auxiliary equipment draws exceed 3.5 kW (e.g. servers, soldering benches, 3D printer clusters, power supplies, high-intensity moving head lights, or fog systems).
- * Inspection: EMD inspects temporary power distribution units (PDUs) and issues a 3-Phase Safety Seal.

D. Fire & Safety Committee Clearance (Disaster Management Cell)

- * Required for soldering/heat guns, aerosol sprays, chemical prototyping, or stage smoke effects.
- * Dedicated CO2 fire extinguishers and safety-trained student marshals must be stationed at venue.

E. Campus Security & Guest Gate Pass Approvals

- * Guest Speakers & Mentors: External mentor vehicle entry & equipment passes filed $\geq$ 3 days prior.
- * Extended Hours Access: Overnight sessions or setups beyond 8:00 PM require DoSA night permits.

3. CAMPUS WI-FI HOTSPOT & EVENT NETWORK RESERVATION PROCEDURES

To provide dedicated wireless network connectivity for auditorium workshops, coding challenges, or guest delegations, clubs must follow the standard 4-phase reservation workflow detailed below:

Phase 1: Online Portal Ticket Submission (Timeline: >= 5 Working Days in Advance)

- * Navigation: Log in to the ClubOps Management Portal -> IT Services -> Request Hotspot & Network Form.
- * Required Inputs: Expected concurrent attendees, duration, target auditorium zone (Stage, Hall, Foyer), and estimated bandwidth quota (e.g., 200 Mbps burstable pipe up to 1 Gbps backbone).

Phase 2: Technical Specifications & Firewall Exceptions (Form IT-NET-WIFI-04)

- * Technical Whitelisting: If the workshop requires Git operations over SSH (port 22), Docker Hub pulls, custom TCP/UDP sockets, or live video streaming (RTMP 1935), list ports explicitly in Section 2B.
- * Approval: IT Network Security Admin signs off within 48 hours of ticket dispatch.

Phase 3: Dedicated SSID Provisioning & Credentials Generation

- * Custom SSID: IT provisions an isolated virtual LAN (VLAN) broadcasting 'EVENT_<ClubName>_2026'.
- * Access Control: Organizers receive a secure QR Code and 16-character WPA3-Personal pre-shared key (PSK) or temporary 802.1X enterprise tokens 24 hours prior to workshop start.

Phase 4: Physical Portable Mesh Hotspot / AP Checkout & Return Protocol

- * Hardware Requisition: For outdoor workshops or auditorium dead-zones, request portable Wi-Fi 6 mesh kits.
- * Equipment Pickup: Collect portable units from IT Operations Room (IT-104) 1 hour prior by submitting student ID card of Club Lead / Tech Coordinator.

4. HANDOVER, COMPLIANCE & PENALTY CLAUSES

1. Equipment Return Deadline: All portable hotspots, adapters, patch cables, and stage stageboxes must be returned to Room IT-104 within strictly two (2) hours after the event adjournment.
2. Facility Restoration: Auditorium stage, seating, and lighting settings must be reset to neutral baseline.
3. Non-Compliance Sanction: Late return or unauthorized electrical modifications results in a 60-day club suspension from reserving campus auditoriums and IT hotspot facilities, plus hardware replacement fines.

AUTHORIZATION & INSTITUTIONAL SEAL

Approved by: Prof. K. R. Sharma, Dean of Student Affairs (DoSA)

Certified by: Dr. V. Sen, Chief Information Officer (CIO) & Head of Campus IT Infrastructure
